

Small Business Information

Doing business with General Dynamics companies

Who We Are

General Dynamics, headquartered in Falls Church, Va., employs approximately 92,900 people worldwide. The company is a market leader in business aviation; land and expeditionary combat systems, armaments and munitions; shipbuilding and marine systems; and information systems and technologies.

More information about General Dynamics is available online at www.generaldynamics.com.

General Dynamics is dedicated to providing products, services and customer support of the highest quality in the respective market segments we serve. We are committed to fully meeting the needs and expectations of our customers. These results are predicated on the strength and dedicated efforts of both our employees, our subcontractors and our supplier base, in providing high quality products and services, on time, at the most competitive price.

General Dynamics Supply Chain Management and Supplier Diversity Programs

Each of General Dynamics' four business segments has a Supplier Diversity program that addresses their specific requirements. To learn more about each respective program and to register, please visit the business segment Supply Chain Management/Supplier Diversity sites and small business contacts listed on the back. For information on the major sectors in General Dynamics, please visit:

www.generaldynamics.com

AEROSPACE

- Designs, manufactures and provides services for mid-size, large cabin and ultra-long range business aircraft.

COMBAT SYSTEMS

- Supplies land and amphibious combat machines and systems, including armored vehicles, power trains, turrets, munitions and gun systems.

INFORMATION SYSTEMS AND TECHNOLOGY

- Expertise lies in specialized data acquisition and processing, in advanced electronics and in battle space information networks and management systems.

MARINE SYSTEMS

- Designs and builds submarines, surface combatants, auxiliary ships and large commercial vessels.
