

Stone County Operations

reactive armor tile integration facility

General Dynamics Armament and Technical Products' Stone County Operations, located in McHenry, Miss., is the Load, Assemble, and Pack facility for the company's Reactive Armor tile program.

GDATP manufactures Reactive Armor tiles for the Bradley Fighting Vehicle (BFV). The BFV is a troop transport designed to provide fire cover to dismounted troops and suppress enemy tanks and fighting vehicles. Reactive Armor provides a substantial increase in protection for troops and equipment against all shoulder-fired weapons and most tube-launched, shape-charge systems.

GDATP's Stone County Operations provides complete assembly, integration, and storage capabilities. In addition to advanced pneumatic palletization and assembly methods, Stone County Operations also provides hardware storage, cassette and tile assembly, seal, paint, box, pack, store and ship capabilities.

Stone County Operations houses approximately 55,000 square feet of manufacturing and storage space.
