

Charlotte Operations

chemical and biological agent detection systems

General Dynamics Armament and Technical Products' Charlotte Operations, located in Charlotte, N.C., provides industry-leading development, manufacturing and integration of advanced biological and chemical agent detection systems.

GDATP's Charlotte Operations produces a wide variety of sensor systems including hand-held chemical agent detectors, on-site biological agent detection systems and long-range chemical agent scanners.

GDATP's chemical and biological systems manufacturing, integration and development capabilities are strengthened by advanced optical, laser, electronic and software prototype labs.

Charlotte Operations is complemented by a highly capable and experienced product design group, as well as industry partnerships with organizations such as the Chemical, Biological and Radiological Technology Alliance, and the Charlotte Research Institute of UNC Charlotte. GDATP's partnerships with these institutions help to build collaborative ties that advance technology and train tomorrow's workforce.

Charlotte Operations houses approximately 100,000 square feet of manufacturing and office facilities, with an additional 23,000 square feet of expansion space.
